Overall Good Science Results Reported So Far on MSL - 1

Scientists report overall good results as the Microgravity Science Laboratory mission approaches the halfway mark of its 16-day flight. Monday night the last run of the Laminar Soot Processes study was completed. Dr. Gerard Faeth, lead scientist from the University of Michigan, said data yielded during this Marshall-managed mission "was beyond my wildest dreams." Ahead, the first SOFBALL combustion test will begin and diffusion studies continue.

Tuesday's NASA TV Schedule
